# Power of Spam Click

A project by ComEngEss group 4

What is it

Power of Spam click is an application that revolutionizes the way we vote. In real life, our voice may be disregarded only because we don't repeat it enough. In power of spam, a person can express their inner thought in form of "poll" that can be voted for. Anyway, the voting method is nothing but conventional. One can cast as many votes as they want here. The three most 'spamable' quotes will be displayed on 'the showcase' at the top of our page, just for the whole world to know. Your quote don't have to be popular, just be persevere and SPAM it to the top.
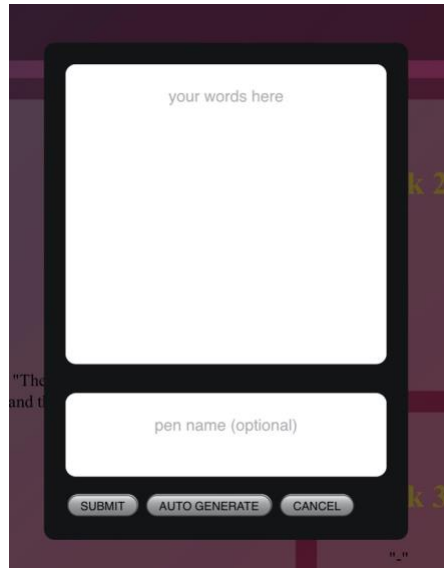

App interface

Main Features

- The Showcase
  - The showcase displays three most clicked quotes. This will be visible to anyone on using the app.

- The poll List
  - This show all the poll existing in the system, including the top three. There is a button for adding the poll. Anyone can add the poll.
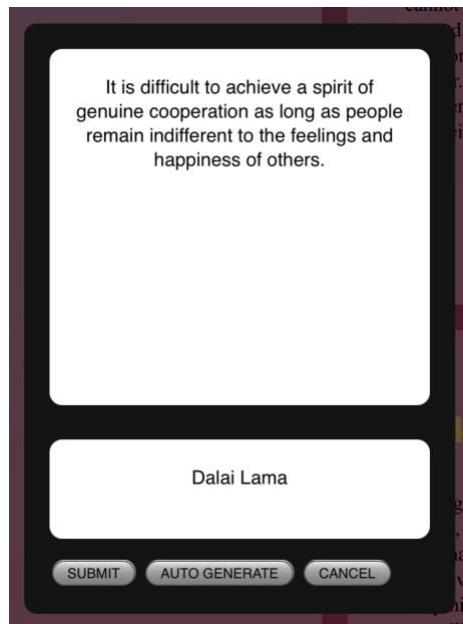

Usage.

- Add your spam
  - You can add your spam by clicking this button. You will have to add something you want to express. You can add a pen name but this is optional. Click 'Submit' and your poll will be displayed on the poll list.

- Generate some random intellectual quote using third party API
  - If you don't have anything in particular to say, just generate it by clicking 'Auto Generate' button in the middle. We get an access a third party project by using their API to have them generate random quotes for us.

- Spam what you like.
  - You can cast a vote(s) easily just by clicking at what you see and like in the poll list. One-person-one-vote just doesn't work here. So you can click as many time as you want!
